

Monthly Notices of the Royal Astronomical Society Volume 26 (Paperback)

By Royal Astronomical Society

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1866 Excerpt: .Sun s light. On this supposition, the prism gives no information whether the material of the coma is solid, liquid, or gaseous. Terrestrial phenomena suggest a condition similar to fog or cloud. If the luminous gas of the nucleus suffers condensation and subsequent diffusion to form the tails of comets, it must pass through a condition in which it neither emits nor in any large degree reflects light. Dark spaces are frequently seen between the envelopes of comets. The observations in full, of which the results are given in this Report, have been communicated recently in two papers to the Royal Society. Mr. Birt continues his observations on the Moon s surface at Hartwell and London, as mentioned in the last Report. During the past year four forms have been issued by the Lunar Committee of the British Association for the advancement of Science, viz. No....
