

Some Pliocene and Miocene Foraminifera of the Coastal Plain of the United States Volume 671-676; Papers (Paperback)

By Joseph Augustine Cushman

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1918 Excerpt: .Cushman, n. sp. Plate X, figure 3. Test subtriangular in front view, very abruptly tapering from the initial end, somewhat twisted, the elongate portion compressed; chambers numerous, the later ones high, with the posterior angle projecting, forming an irregular serrate peripheral margin; sutures indistinct, as in the later portion; wall composed of coarsely agglutinated material with a large proportion of cement; aperture rather large, at the base of the inner margin of the last-formed chamber. Length, 1.30 millimeters. Type specimen (U. S. N. M. No. 325315) and others were taken from sand included in the valves of *Balanus proteus* from the Miocene of Virginia (no definite locality given). This is a very peculiar-shaped species in its subtriangular form, serrate margin, and peculiar surface material, as well as in the twisted character of the early portion. Genus *BOLIVINA* D Orbigny, 1839. *Bolivina marginata* Cushman, n. sp., yi...
