Reviews

A top quality publication as well as the typeface used was intriguing to learn. Yes, it is play, still an amazing and interesting literature. I discovered this publication from my i and dad suggested this book to learn.

W. (11871 and 21309), is a girl 16 years of age. She presents a somewhat emaciated, stunted appearance and has a listless manner. Present illness. Complaint. - She first appeared at the Clinic September 5, 1917, with symptoms as given below, and was diagnosed as a chorea. She came again May 11, 1918, having been referred by the Roosevelt Hospital and also, apparently, by Social Service. Some two years before the latter date she had an attack of nervousness, her hands and lips shook and she dropped things. This lasted several months. A second, similar attack began in the summer of 1918 and lasted about two months. Before each attack she had vomiting and abscesses and was run down. She vomited for three months, couldn't keep things on her stomach during both attacks. Blood was vomited while in the hospital. She had fever, especially in the afternoon. Besides the above she had a bladder trouble which became worse during these attacks. The bladder trouble dated from childhood and was concealed from her mother. She used to have nocturnal enuresis and also occasionally diurnal, in school. Her later bladder trouble, however, which was worse during her nervous attacks, was a difficulty in micturition, for which she had to be catheterized. She had been attending Roosevelt Hospital for five months previous to May, 1918, apparently on account of her bladder trouble. Blood was also passed, its exact origin not having been determined. A catheterization performed during November, 1918, gave a considerable quantity of bloody...
