As embedded systems increasingly permeate our daily lives on all levels, from microscopic devices to international networks, the cost-efficient development of reliable embedded software is one of the grand challenges in computer science today. The purpose of the workshop is to bring together researchers in all areas of computer science that are traditionally distinct but relevant to embedded software development, and to incubate a research community in this way. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.
