

## Radiative Flux Changes by Aerosols from North America, Europe, and Africa Over the Atlantic Ocean: Measurements and Calculations from Tarfox and Ace-2

Filesize: 3.97 MB

### ***Reviews***

*Absolutely essential go through pdf. Of course, it can be enjoy, still an amazing and interesting literature. Your way of life period will be convert the instant you comprehensive reading this article ebook.*

To read **Radiative Flux Changes by Aerosols from North America, Europe, and Africa Over the Atlantic Ocean: Measurements and Calculations from Tarfox and Ace-2** eBook, please refer to the web link below and download the document or have accessibility to other information that are highly relevant to RADIATIVE FLUX CHANGES BY AEROSOLS FROM NORTH AMERICA, EUROPE, AND AFRICA OVER THE ATLANTIC OCEAN: MEASUREMENTS AND CALCULATIONS FROM TARFOX AND ACE-2 book.

BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 24 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. Aerosol effects on atmospheric radiative fluxes provide a forcing function that is a major source of uncertainty in understanding the past climate and predicting climate change. To help reduce this uncertainty, the 1996 Tropospheric Aerosol Radiative Forcing Experiment (TARFOX) and the 1997 second Aerosol Characterization Experiment (ACE-2) measured the properties and radiative effects of American, European, and African aerosols over the Atlantic. In TARFOX, radiative fluxes and microphysics of the American aerosol were measured from the UK C-130 while optical depth spectra, aerosol composition, and other properties were measured by the University of Washington C-131A and the CIRPAS Pelican. Closure studies show that the measured flux changes agree with those derived from the aerosol measurements using several modelling approaches. The best-fit midvisible single-scatter albedos (approx. 0.89 to 0.93) obtained from the TARFOX flux comparisons are in accord with values derived by independent techniques. In ACE-2 we measured optical depth and extinction spectra for both European urban-marine aerosols and free-tropospheric African dust aerosols, using sunphotometers on the RV Vodyanitskiy and the Pelican. Preliminary values for the radiative flux sensitivities (Delta Flux Delta Optical depth) computed for ACE-2 aerosols (boundary layer and African dust) over ocean are similar to those found in TARFOX. Combining a satellite-derived optical depth climatology with the aerosol optical model validated for flux sensitivities in TARFOX provides first-cut estimates of aerosol-induced flux changes over the Atlantic Ocean. This item ships from La Vergne, TN. Paperback.
