PRINCETON ARCHITECTURAL PRESS, United States, 2009. Paperback. Book Condition: New. P. 234 x 192 mm. Language: English . Brand New Book. Rising stars in Boston s design scene, architects Eric Howeler and J. Meejin Yoon have in a single decade developed a reputation for radical experiments in architectural form. Their design methodology what they call an expanded practice combines intense research with interdisciplinary experimentation. Howeler and Yoon s sensational, competition-winning lighting entry for the 2004 Athens Olympics exemplifies their fearless approach: without any prior experience in public space interactive design, the firm constructed a luminous, interactive soundscape installation at the base of the Acropolis. White Noise White Light featured a field of semiflexible fiber-optic strands that emitted white light and white noise in response to the movement of pedestrians. The project, an enormous success, enchanted a multitude of visitors who moved amidst the cilia of light. Expanded Practice presents twenty-nine recent projects by this young firm encompassing a broad range of scales and media. The projects, divided into distinct but often overlapping research themes, include a museum courtyard program inspired by the Voronoi cell-packing algorithm (PS1 Loop); an outdoor light installation featuring hovering cones that capture and interact with solar energy, rainwater, and sound (Hover); a garment designed to turn inside out as it unravels (Mobius Dress); and a landscape design that weaves technology and texture into an integrated and interactive landscape (Tripanel). Packed with drawings, diagrams, and photographs of each project s design process, Expanded Practice provides an inspirational look into one of the most exciting young firms working in architecture today.
